The new POLISHFLEX and RETECFLEX win the iF product design award 2011.

An unbeatable duo! Flex has once again succeeded in winning the coveted iF product design award. After already receiving the renowned iF product design award 2010 for its Vario-Giraffe last year, Flex was able to outshine its highly qualified rivals from the competitive international market with two outstanding products. A total of 2,756 products were submitted by 1,121 participants from 43 different countries. The members of the internationally comprised jury were impressed with both the POLISHFLEX and the RETECFLEX.
